

Why we collect HoNOS

The following applies to the HoNOS family of measures. For more information see the suite of [HoNOS guides for New Zealand clinicians](#) on the Te Pou website.

Service user hears about their progress

Clinician can use HoNOS for:

- » assessment
- » planning care
- » reviewing care
- » discharge planning
- » monitoring case load

MDT can use HoNOS for:

- » allocation of referrals
- » common language for reviewing care
- » team outcome reports
