

Outcome report card for adult mental health services

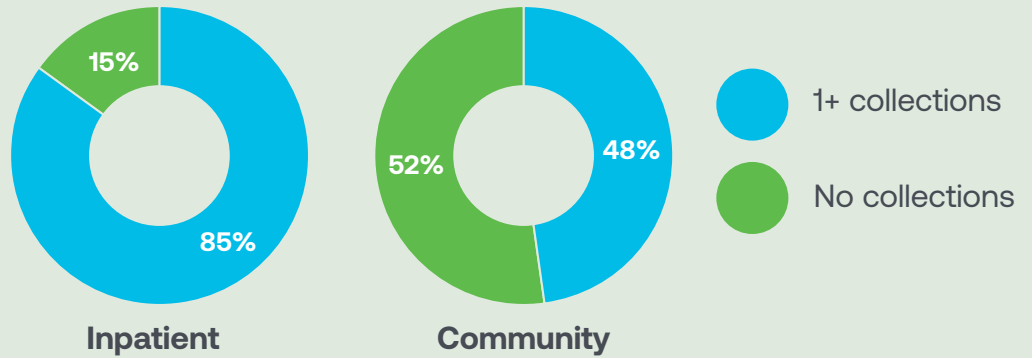

This shows select results from PRIMHD summary report HoNOS, National April 2019 - March 2020. For more information read the full [report](#) and also [refer to the accompanying user guide](#).

This report uses HoNOS (health of the nation outcome scales). HoNOS is a simple outcome measure used in adult services. It has 12 items scored from 0 to 4 where 0 is no problem and 4 is a serious problem.

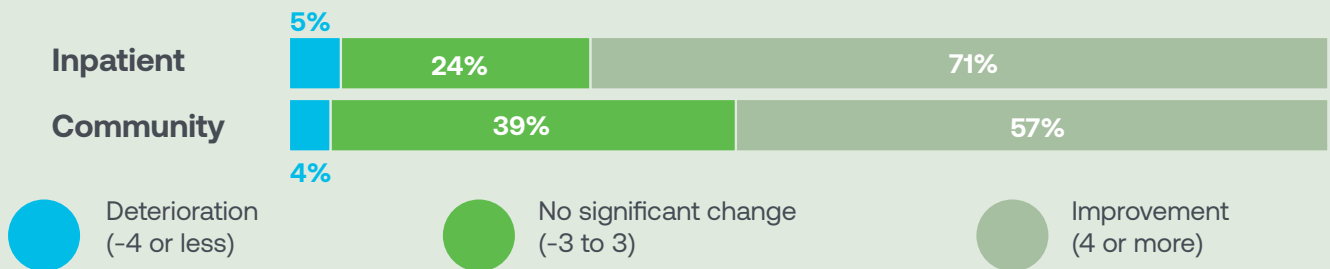

Outcome collection in a three month period (Jan-Mar 2020)

Currently it is meant to be collected with a 80% collection rate.

Change in total score from admission to discharge (Apr 2019 - Mar 2020)

Total score refers to adding all 12 items of HoNOS together. It uses matched pairs from admission to discharge for the same tāngata whai ora.

Index of severity while in service for different team types (admission and review)

HoNOS scores can be collated to indicate severity. For more information [see user guide](#).
